Dean A Tripp, PhD

Professor

Departments of Psychology, Anesthesiology, & Urology

62 Arch Street, Humphrey Hall

Kingston, Ontario, K7L 3N6 Canada

Chair – Queen's Health Sciences Research and Ethics Board (2023-2028)

Department of Athletics, Varsity High-Performance Program, Mental Training Coach

Lead for IMAGINE_SPOR's Mental Health (Psychiatry/psychology) Working Group

Email: Dean.Tripp@Queensu.ca

Website: http://www.queensu.ca/psychology/painlab/home.html

Research Interests.

Current lines of research concern pain and psychosocial experiences (self-regulation) across various clinical populations. New grants and research projects are focused on:

- Models of self-regulation and suicidality in Inflammatory Bowel Disease (IBD), Chronic Pelvic Pain, Prostate Cancer
- Pain phenotyping, Sexual Dysfunction, CBT Group Therapy in (IBD)
- Pain, relationship distress, and disability in women suffering from chronic Interstitial Cystitis / Bladder Pain Syndrome (IC/BPS) and Chronic Prostatitis/Chronic Pelvic Pain Syndrome (CP/CPPS)

Academic Profile.

2022-2030	Chair – Health Sciences Research and Ethics Board
2018-2022	Chair - General Research and Ethics Board
2018	Professor, Department of Psychology, Queen's University.
2007-2018	Associate Professor, Department of Psychology, Queen's University.
2003	Cross-Appointed: Department of Urology, Queen's University.
2002	Cross-Appointed: Department of Anesthesiology, Queen's University.
2001-2007	Assistant Professor, Department of Psychology, Queen's University.
2000	Assistant Professor, Department of Psychology, Acadia University.

Education.

1995 - 2001	Ph.D., Clinical Psychology, Dalhousie University (DAL), Hfx., N.S.
1991 - 1993	M.Sc., Clinical Psychology, Saint Mary's University (SMU), Hfx., N.S.
1988 - 1991	B.A. Honours, Psychology, SMU.

Awards, Nominations, & Honors.

2016 Nominated for "Frank Knox Teaching Excellence Award," Queen's AMS
2015 Nominated for "W.J. Barnes Teaching Award" Arts & Science Undergraduate Society.
2015 Nominated for "Frank Knox Teaching Excellence Award," Queen's AMS
2012 Nominated and Invited to TEDx talk (i.e., Self-regulation and Resilience).
2011 Awarded the "Excellence in Interprofessional Pain Education Award" – CDN Pain Society
2011 Nominated for Chancellor A. Charles Baillie Teaching Award, Queen's University
2011 Nominated for the Excellence in Graduate Supervision Award
2009 Nominated for the "TVO (TV Ontario) Best Lecturer Competition 2010."
2009 Awarded the "Frank Knox Teaching Excellence Award," Queen's AMS
2008 Nominated for "Frank Knox Teaching Excellence Award," Queen's AMS
2008 Nominated for the "TVO (TV Ontario) Best Lecturer Competition 2009."
2008 Awarded the "Early Career Award" - Canadian Pain Society
2006 Nominated for "Frank Knox Teaching Excellence Award," Queen's AMS
2005 "Popular Professor" by student body Maclean's Magazine Guide to CDN Universities
2004 Nominated for "Frank Knox Teaching Excellence Award," Queen's AMS
1994 University Academic Gold Medal, SMU

- Create and conduct team talks working with the coach's trajectory of the team and issues to be resolved.
- Work with coaches to discuss stressors, problem solves, and maximize their positivity and outlook on successes.
- Range of training covers: Pre-game prep/anxiety, pain control & injury management, resiliency training, team cohesiveness, instruction in self-regulation, awareness of emotions training, impulse control, acceptance strategies, stress inoculation training, and motivation enhancement.

2016-22 **Queen's University Department of Athletics, Varsity High-Performance Program Mental Training Coach**.
- Provided individualized mental training program to all varsity sports.
- Range of training covered: Pre-game prep/anxiety, pain control & injury management, resiliency training, team cohesiveness, instruction in self-regulation, awareness of emotions training, impulse control, acceptance strategies, stress inoculation training, motivation enhancement.

INDUSTRY:

2021 **ABBVIE** - Provided invited talk on my IBD research focusing on Mental Health in IBD. Discussed the mechanisms of poor mental health and suicidality in IBD patients.

2020 **Takeda** - Provided invited talk on my IBD research focusing on Mental Health in IBD. Discussed the mechanisms of poor mental health and suicidality in IBD patients.

2020 **ROCHE** - Provided discussions on empathy, patient recruitment and retention issues in clinical trials.

2019 **ALK** - Provided plenary talk on recruitment and retention methods in clinical trials. Chicago; Barcelona.

2019 **ROCHE** - Provided plenary talk on recruitment and retention methods in clinical trials. Barcelona; Athens.

2018 **Medtronic** – Presented plenary talk on "Understanding and Communicating with Patients." Hong Kong, Sydney AUS, Frankfurt Germany.

2018 **Novartis** – Keynote for Canadian National Meeting. "Happiness, resiliency & emotional self-regulation as keys to life & workplace productivity." Montreal Que., Canada

2018 **CPM Toronto** - Provided plenary talk entitled "Are we designed to fail: The special case for Chronic pain."

2018 **Indivior Canada Ltd**. – Presented and moderated the Kingston Educational Session "The Treatment and Management of Opioid Use Disorder within a Family Practice" to a group of GPs, RNs and NPs.

2017 **ROCHE –** Provided plenary talk on Motivating patients within clinical trials at a training conference for study investigators for US centers. Critical aspects of the word were interpersonal management and caregiver support issues.

2016 **Novo Nordisk** - Provided plenary talk at training conferences for study investigators for US and European centers focused on patient recruitment and retention (i.e., adherence behaviour red flags and what to do).

2012-13 **ROCHE –** Provided workshops and plenary talks at a training conference for study investigators for US centers.

2010-11 **ROCHE –** Provided workshops and plenary talks at a training conference for study investigators for US centers. (Tucson, Montreal)

2009-10 **ROCHE –** Provided workshops and plenary talks at a training conference for study investigators for US centers. (Dallas, Scottsdale, Orlando)

2009-10 **VPI incorporated** – providing debriefing and educational training for service staff and management on clinical/contact issues concerning pain in injured insured persons. (Toronto)

2009-10 **Jansen-Ortho Corp** – Provided research consultations and physician training on patient management, screening for opioid addiction, and managing complex patients.

2009-10 **Purdue Pharma Corp** - Provided consultations to physician training and managing complex behaviour.

2007-08 **Drug Information Research Centre** – Provided consultation on developing an educational program for Ontario Pharmacists managing non-adherence behaviour in methadone patients.

2007-08 **Jansen-Ortho Corp** – Provided consultations to physician training on patient management, screening for opioid addiction, and presentation skills on an ongoing basis.

2006 **Workers' Compensation Board of Nova Scotia** – provided debriefing and educational training for service staff and management on clinical/contact issues concerning Chronic Pain patients.

2006 **Jansen-Ortho Corp** – Provided consultations to physician training on patient management, screening for opioid addiction, and presentation skills on an ongoing basis.

2006 **Purdue Pharma Corp** - Provided consultations to physician training on patient management.

2005 **Queen's Pain Consultant -** I provided a pain management assessment and treatment program. I am the sole provider in the Adult Chronic Pain Division. This is also an observership for residents in Anesthesiology. In addition, I have provided clinical

supervision for 4 Anesthesiology residents and 2 Psychology students. This training and education I provide are not registered under other forms of teaching.

2004 **Workers' Compensation Board of Nova Scotia** – provided educational training for staff and management on research and clinical issues of Chronic Pain

2004 **Jansen-Ortho Company -** Invited Key speaker at Nurses Advisory Board meeting for "Raising the Standard of Care in Chronic Pain Management."

2004 **Jansen-Ortho Company -** Invited speaker at the educational session for staff/research department on issues in patient management in chronic pain.

2002-04 **Hotel Dieu Hospital Pain Psychologist/Consultant** - I was the consultant to the Chronic Pain Clinic in the Department of Anesthesiology at the Hotel Dieu Hospital, providing research assessment and therapy. Chronic pain conditions include fibromyalgia, low back pain, central pain, Chronic Prostatitis, Interstitial cystitis, etc.

Continuing Professional Development.

2022 Queen's Managerial and Professional Group – Working in a hybrid environment
2022 Humanity in healthcare workshop: the conversation continues – Queen's Hea; lth Sciences Faculty Development
2022 Embedding EDI in Knowledge Mobilization, Knowledge Translation, and Data Management - Queen's Human Rights and Equity Office
2022 Introduction to EDI in Research Design – Queen's Human Rights and Equity Office
2022 Developing Inclusive Research Teams – Queen's Human Rights and Equity Office

2021 Harassment and Discrimination Policy – Queen's University
2021 Indigenous Community Engagement

2018 Aboriginal History and Political Governance. Online w Cancer Care Ontario.
2018 First Nations, Inuit, and Metis Culture, Colonization and the Determinants of Health. Online w Cancer Care Ontario.
2018 Research Collaboration with Indigenous Communities

2017 Gender Identity Sensitivity - online training course

2015 Queen's University's "Human Rights 101" Training
2015 Queen's University's "Access Forward" Training

2014 Health and Safety

2010 Equity training. Queen's University.

2006 Certificate from Queen's University Centre for Teaching and Learning. *"Focus on Graduate Supervision."*

Professional Memberships.

2020-present	Associate member of the Canadian Urological Association
2004-present	Affiliate member of American Urological Association
2018-present	Canadian Association of Research Ethics boards (CAREB)
2004-2015	American Pain Society (APS)
2002-2018	Canadian Pain Society (CPS)
2002-2017	International Association for the Study of Pain (IASP)
2000-2010	Canadian Psychological Association (CPA)
2000-2015	American Psychological Association (APA)
2000-2003	Assoc for Advancement of Applied Sport Psychology (AAASP)

Teaching Portfolio

Teaching Philosophy – Dean A. Tripp, PhD

Early in my independent teaching career as a graduate student (1991-1992), when I was teaching a full-year Introduction to Psychology class to 350 students, my vision of teaching was a transmission model where I would provide students with the information or content through didactic lectures. My own University experiences in the classroom shaped this initial delivery style. However, I felt comfortable in this style, and my willingness to listen and respond to students' questions during large lectures and their desire to engage me led to second thoughts. After attending a teaching roundtable at the center for learning at Saint Mary's University that year, I was resolute in making a concerted effort to bring the large lecture hall to "life" for students. I remembered hearing of the British Nuffield approach, which focused on a "process" approach emphasizing the student as an active participant in the classroom or lab. I started by providing the class with a question and discussion period where they would be asked to discuss a topic or issue in mental health with a group of students surrounding them and then asked for the group feedback. It was noisy but exciting, and the student response was tremendously upbeat! From that year on, my teaching large and small classes found a new direction and purpose. I was convinced then and still today that good education has to involve students acting actively in their learning.

Throughout my University teaching career, I have sought out and used different teaching methods. For example, I have used clickers and in-class surveys, group activities in large and small classes, and multiple points during the course where I stopped the lecture and asked for student volunteers to help me explain a subject. I have had students present posters in an in-class conference on particular topics to each other. I have also used Twitter and other forms of social media to communicate with students, including skype. I bring "real" people to class to discuss mental health issues from patients' perspectives. I require students to write reflection papers on the meaning of their educational experiences in their broader life. I provide colourful case examples in all my classes and teach life lessons within the chaos of the terrible experiences people face and conquer or succumb to. This level of communication is deep and emotional for many of my students. I am always willing to learn from my students what excites them or scares them. Without a doubt, a teacher also needs to know. I have taken graduate supervision courses, attended many meetings concerning teaching methods and applications, and sought advice from education experts within my university and elsewhere. I have committed many hours to committees where educational transformation is of keen interest in and outside the University (e.g., Psychology 100 redesign committee, Educational Sig of Canadian Pain Society).

In recent years, my teaching philosophy has focused on interactive learning, using new tools, and manipulating learning situations (e.g., small-group education and discussion). I also have focused on the characteristics of excellent teachers for inspiration. Perhaps most importantly, I believe in communicating and practicing a fair and respectful attitude with my students in and out of the classroom. Students have always supported my firm belief in respecting learners' opinions and positions. I always try to encourage critical thinking and independence of ideas based on empirical findings… a scientist-practitioner model. I add to this by honestly communicating the limit of my knowledge while stressing the necessary tactics for amassing balanced and thoughtful perspectives (i.e., critical thinking). I carry this interactional respect further and spend considerable time considering learner assessment. As such, I have employed many types of assessment, including group projects, independent writing, intrapersonal reflection papers, in-class presentations, student workshops where they teach the class a

topic, peer evaluation, etc. I also provide individualized, detailed feedback when conducting seminar and graduate classes, especially in the Clinical Psychology Therapy classes I teach (N = approx 5-7).

As suggested above, I have actively used technology in teaching when I have viewed it as appropriate. I have been recently intrigued by new approaches (blended teaching models) and have successfully implemented parallels between my previous teaching style and new technologies. I have used computer-administered testing, developed computer-assisted learning units (e.g., Psychology 100), and used electronic bulletin boards at the university. In my consulting teaching outside the University, I have conducted web-based series for working professionals, I have filmed an educational film series for Health Psychology called the Chapter Insider (McGraw-Hill), conducted numerous small interactive workshops, and I have been highly active in Interprofessional Education (please see CV for details). In nearly all of these experiences, I have found that learners greatly benefit from using technology.

I have also become very aware of "learning styles." My group has presented at a National Meeting (Canadian Pain Society Meeting) outlining physician learning styles. It is critical to acknowledge that students learn in different ways, which may act as a disconnect to the instructional kind of the Professor. Thus, flexibility and variety of teaching are not just essential but mandatory. In my classes, I have tried to find a middle ground by using figures, diagrams, animated graphics, and in-class demonstrations for visual learners, all in addition to oral and written explanations in classes.

These experiences have left me in the position to "see" and implement many beneficial advances in the science and practice of teaching. My teaching goals continue to evolve. But the themes that shall remain consistent in my teaching include the communication of my infectious passion for learning, the exhibition of critical thinking processes, respect for other's opinions, and debate.

Teaching: Innovative Course Designs.

2020-2021

Online - Health Psychology 332. This senior undergraduate course was redesigned to be delivered online. In addition, the learning labs were reformatted to online group labs, where students formed groups to discuss and prepare position papers on health psychology subjects (e.g., cancer, aboriginal health disparity, etc.). These sessions are offset with a weekly asynchronous lecture.

2017-2018

Health Psychology 332. This senior undergraduate course was redesigned with 8 learning labs, where students formed groups to discuss and prepare position papers on health psychology subjects (e.g., cancer, aboriginal health disparity, etc.). These sessions are offset with a weekly lecture.

2010-2013

Senior Undergraduate course on Positive Psychology, which is the scientific study of optimal human function. Lectures critically review the history and current empirical support in the field, such as pleasure and positive experience, happiness, interpersonal relationships, and applying positive thinking. Assignments will enhance student learning by utilizing generative exercises and intra or inter-personal lab assignments.

2002-2014

"Graduate Psychotherapy – Interpersonal Psychotherapy (IPT) Intervention"

This course can be broken down into three related skill development components within the scientist-practitioner model. In the first section of the course, students are provided with a workshop exposure and a general overview of IPT. During the second part of the course, students are required to practice and demonstrate, by videotape, several manualized components of the IPT approach for treating depression (treatment protocols, such as the first session, making joint therapy decisions). In the final part of the course, students are paired with actors playing depressed patients seeking assistance. All sessions are to be videotaped and reviewed by the professor and peer group for content and execution of skills. Particular emphasis will be placed on technical difficulties within the context of the therapy matched to the student's level of psychotherapy experience.

2000-2001

"Advanced Psychological Intervention."

I was responsible for establishing a collaborative link between the Acadia University Counseling Center and the Department of Psychology. The link is a referral network wherein depressed university students from the center are offered psychotherapy through the advanced psychological intervention course. The course is a Cognitive Behavioral Therapy training opportunity that uses a structured/manualized treatment framework. Graduate students deliver treatment. Graduate students are supervised in an individual and a group supervision format. All sessions are videotaped for supervision.

Clinical Work / Specialized Training…

Jan 2009 – Dec 2010

I was involved with a private practice for selected clients.

Jan 2004 – Dec 2005

I was involved with a private practice for selected clients. I also provided service in the Department of Anesthesia for Chronic Pain.

2001-2004

Consulting Practice: I had been the sole service provider running a Chronic Pain Clinic providing assessments and therapy to various patient conditions, including fibromyalgia, generalized myofascial pain, and Chronic Prostatitis.

2000-2001

Consulting Practice:

During this time, I was in private practice in Nova Scotia. My clinic focused on depression, pain, anxiety and couples' issues.

1999-2000.

Pre-Doctoral Internship, Queen Elizabeth II Health Sciences Center. Completed significant rotations in the Health Psychology & Mental-Health areas. **Health Psychology**: serviced diverse patient populations, including G.I patients, Diabetes, Cardiovascular Risk Management, Procedurally Phobic Patients, Infectious Diseases (HIV, Hep-C), PTSD, Liver Transplant, and Chronic & Acute Pain patients. Clinical issues focused on treatment adherence and change processes in psychotherapy within medicine using a CBT framework. **Mental-Health**: Serviced psychiatric populations with mood disorders in inpatient & outpatient settings and completed a primary focus on anxiety disorders. The primary intervention was CBT. Particular emphasis is placed on the assessment of Tx. Readiness & compliance.

I.W.K. Mood Disorders Group Klerman's Interpersonal Psychotherapy for Depression in Adolescents (IPT-A). This training consisted of an intensive three-day workshop in IPT, weekly group supervision meetings to review case status and progress, and continued readings. Certification in IPT-A required therapy to be conducted with no less than 6 depressed adolescents (MDD).
