Queen's University Food Services Guidelines Regarding "Pot Luck" Suppers

Preamble:

As a number of questions have arisen regarding the distinction between occasions where the provision of food to the campus should be authorized by Queen's Food Services and where the event would be considered private or "pot luck", this policy will provide general guidelines for campus departments regularly involved in the booking of space such as the JDUC, Residences and Space Planning.

Authorization by Queen's Food Services:

Should an event involve the provision of food either from an off-campus caterer or from an informal group affiliated with the University, an authorization from Queen's Food Services will normally be required.

Authorization will involve discussions of the reason for foregoing the on-campus caterer(s), liability, health unit concerns & guarantee of insurance in the amount of \$5,000,000.

Private Functions/"Pot Luck Suppers"

Authorization by Queen's Food Services would not normally be required where the event would be considered private or of a "pot luck" nature. It is not the intention of Queen's Food Services to prevent the private gatherings of the campus community where food and non-alcoholic beverages would be exchanged.

As this is a broad statement, the following guidelines will help in determining if the event falls within this category:

- The Food should be provided by and for the consumption of those attending the event. This is distinguished from a small group of persons providing food to a larger group; in such cases authorization is required.
- There should be no charge of admission or sale of food/non-alcoholic beverages.
- Attendance should be limited to the group involved and should not be offered to the public.

PLEASE NOTE: Under the Liquor License Act, alcoholic beverages may not be provided (with or without fee) unless authorized & provided through the campus liquor license.

HAND WASHING PROCEDURES FOR FOOD SERVICE WORKERS

Fact: The hands are the number one source of spreading food-borne illnesses.

Fact: Proper, frequent hand washing can minimize the spread of such illnesses because hand washing breaks the chain from contamination to food.

- Apply soap using friction. Lather well for a least 20 seconds. Pay special attention to fingertips and thumbs.
