ONE CLICK COULD OPEN YOUR COMPUTER UP TO AN ATTACKER!

Your data and personal profile, once captured, could be purchased by companies, advertisers, criminals ... anyone!

Visiting a website ... unseen tracking files record your online activity. Every key stroke is monitored by hackers.

Malware and viruses affect your computer allowing hackers to access your files, passwords, emails ... anything stored on your computer.

ASK YOURSELF

1. Where did the link come from?
2. What's on the other side?
3. Why am I clicking the link?
