Psyc 202 Queen’s University – Statistics in Psychology (revised Sept. 10)

Fall 2013

This material is copyrighted and is for the sole use of students registered in Psyc 202. This material shall not be distributed or disseminated to anyone other than students registered in Psyc 202. Failure to abide by these conditions is a breach of copyright, and may also constitute a breach of academic integrity under the University Senate’s Academic Integrity Policy Statement.

Instructor: Ronald R. Holden
Phone: 613-533-2879
Email: holdenr@queensu.ca

Office Hours: Wednesday 1:00 – 2:00 pm
Office Location: Humphrey Hall 352

Lecture Room: Humphrey Auditorium
Lecture Day & Time: Monday 4:00 – 5:30 pm, Wednesday 2:30 – 4:00 pm

Labs are scheduled for 1.5 hours.
Lab Room: Humphrey Hall 219

Lab Section, Day, & Time:
Section 005 Tuesday 10:00 am
Section 006 Tuesday 11:30 am
Section 002 Tuesday 2:30 pm
Section 003 Tuesday 4:00 pm
Section 004 Tuesday 6:30 pm
Section 007 Wednesday 8:30 am
Section 008 Wednesday 10:00 am
Section 010 Wednesday 11:30 am
Section 009 Wednesday 1:00 pm

COURSE DESCRIPTION:
This course provides a basic introduction to data management and analysis - from the formulation of interesting research questions, through the design of experiments and statistical analysis, to final publication of results in papers and seminars. Emphasis is on the use of computers to facilitate this process, on the practical application of statistical methods, and on developing analytic and critical thinking.

LEARNING GOALS:
This course will introduce you to the basic concepts of statistics. The focus will be on understanding how statistics work and how to use its tools appropriately. The course will give you the necessary background to appropriately collect and correctly analyze your own data, and also to understand and critically evaluate published results. In addition, the aim is to provide you with the basic knowledge to deal with more advanced concepts in future courses or applications. Finally, the course will introduce you to statistical software that will be useful for the rest of your academic career.

LEARNING OBJECTIVES:
This course has four main objectives. First, it will explain the foundations of statistical methodology. Even though we will encounter mathematical formulae, the aim is to relate the mechanics behind statistical tools rather than mathematical theory. Second, we will use this foundation to determine how best to collect data
and, once that step is accomplished, we will determine which statistical tools are most effective and suitable for the analysis of your data (you don't want to grab a hammer if you've got a screw). Third, you will learn how to interpret and critically discuss statistical results presented in papers and presentations. Finally, the course will introduce you to statistical software. This will give you a solid grounding for future use of that software, and it will give you a head-start for learning other software packages in the future.

TEACHING ASSISTANTS:

Name and email

Katharine Bailey 11kb16@queensu.ca
Madeleine D’Agata 11amd8@queensu.ca
Michael Grossman michael.grossman@queensu.ca
Nida Latif n.latif@queensu.ca
Amy O'Neil 9ao19@queensu.ca
Allisha Patterson 7ap33@queensu.ca
Amanda Timmers 6at9@queensu.ca

COURSE REQUIREMENTS

Required Textbook:

Recommended Book:

Additional Textbooks: There are a host of other books available. If interested in books that offer more detail and more topics, talk to me.

Technological Requirements:

Make sure you are familiar and comfortable with Moodle.

Calculators acceptable for use during quizzes, tests and examinations are intended to support the basic calculating functions required by most Arts and Science courses. For this purpose, the use of the Casio 991 series calculator is permitted and is the only approved calculator for Arts and Science students. This inexpensive calculator sells for around $25 at the Queen's Campus Bookstore, Staples and other popular suppliers of school and office supplies (http://www.queensu.ca/artsci/help/topics/calculator-policy).

You will need to use SPSS (statistical software package) to complete your assignments. This package is available on all of the computers in the Humphrey Hall 219 lab, and you will have time during lab sessions to work on your assignments. SPSS may (or may not) also be available on computers in the Stauffer Library Queen’s Learning Commons (QLC). Before relying on doing assignments at the QLC, please verify access hours and that the computer you will be using has SPSS available.
To access SPSS v.21 at the QLC:
- log in to a computer using your netid and password
- open desktop folder "Microsoft Office & Other Programs"
- open subfolder "Statistical Analysis Software"
- open IBM SPSS Statistics 21
- * Remember to save work frequently to a USB or network drive
- * Remember to log off before leaving the computer all of the campus libraries.

Alternatively, a student version of SPSS is available for purchase at the campus computer store, if you prefer to have the program available on your home computer. You are NOT required to purchase SPSS for the purpose of this course.

ORGANIZATION OF THE COURSE
This course consists of lectures and labs. Labs, in which we introduce you to SPSS and work on some concepts in more detail, begin in Week 2. Labs build on the materials covered in the previous lectures and on assigned reading in the text book. The more you follow lectures and work through the text book, the more you will get out of these labs.

There will be two types of labs. ‘Teaching labs’, held in weeks 2, 4, 6, 7, 9, and 11, will deal with SPSS and statistical concepts, and attendance during these labs is required. ‘Help labs,’ in weeks 3, 5, 8, 10, and 12 are on a drop-by, come-as-needed basis. Consider them as your help-desk for this course, and an opportunity to work on your assignments. If you are not clear about lecture topics, anything we did in tutorials, things in the book, or anything else, don't wait: come to your next lab period and let us help you.

If you are not sure what type of lab is scheduled for a certain week, check the Course Schedule below. If it is a 'teaching lab', you must attend. If it is a 'help lab', you can get your questions answered and stats problems solved. Remember: both types of labs are scheduled at the same time during different weeks.

COURSE POLICIES

Attendance: You are expected to attend all lectures and 'teaching labs'. The 'help lab' sessions are voluntary, but you are strongly encouraged to make use of them. It is often much easier to explain things in person rather than through email. In addition, you can get exactly the help you need, without having to spend lots of time emailing back and forth just to clear up a misunderstanding.

Assignments & Exams: It is your responsibility to notify the instructor in advance if for some reason you are unable to write an exam or hand in an assignment on time. You must provide signed documentation of the reason that you are unable to write the exam or hand in the assignment.

Special Accommodations: It is your responsibility to notify the instructor as early as possible if you require any accommodations during exam writing.

Disability Accommodations Statement

From the Queen’s Policy Concerning Students with Disabilities (approved by Senate, November 21, 1996):

“Queen's University is committed to achieving full accessibility for persons with disabilities. Part of this commitment includes arranging academic accommodations for students with disabilities to ensure they have an equitable opportunity to participate in all of their academic activities. If you are a student with a disability and
think you may need accommodations, you are strongly encouraged to contact the Disability Services Office (DSO) and register as early as possible. For more information, including important deadlines, please visit the DSO website at: http://www.queensu.ca/hcds/ds/

Academic Integrity:

Academic integrity is constituted by the five core fundamental values of honesty, trust, fairness, respect and responsibility (see www.academicintegrity.org). These values are central to the building, nurturing and sustaining of an academic community in which all members of the community will thrive. Adherence to the values expressed through academic integrity forms a foundation for the “freedom of inquiry and exchange of ideas” essential to the intellectual life of the University (see the Senate Report on Principles and Priorities http://www.queensu.ca/secretariat/policies/senateandtrustees/principlespriorities.html).

Students are responsible for familiarizing themselves with the regulations concerning academic integrity and for ensuring that their assignments conform to the principles of academic integrity. Information on academic integrity is available in the Arts and Science Calendar (see Academic Regulation 1 http://www.queensu.ca/artsci/academic-calendars/2011-2012-calendar/academic-regulations/regulation-1), on the Arts and Science website (see http://www.queensu.ca/artsci/academics/undergraduate/academic-integrity), and from the instructor of this course. Departures from academic integrity include plagiarism, use of unauthorized materials, facilitation, forgery and falsification, and are antithetical to the development of an academic community at Queen’s. Given the seriousness of these matters, actions which contravene the regulation on academic integrity carry sanctions that can range from a warning or the loss of grades on an assignment to the failure of a course to a requirement to withdraw from the university.

Teaching Labs: They start in week 2. Following week 2, teaching labs are scheduled in weeks 4, 6, 7, 9 and 11. Attendance of these labs is compulsory. The main objective is to get hands-on experience with some of the concepts covered in the course and with SPSS. Thus, the teaching labs are crucial in gaining the knowledge you need to complete assignments and projects. In addition, we will repeat and/or deepen some points from lectures and textbook.

Help Labs: Help labs are scheduled starting in week 3, and then in weeks 5, 8, 10 and 12. Even though they are not compulsory, please attend the lab period you are scheduled for, if you need help. This simply ensures that you won’t have to wait in a long line-up to get the help you require. It will also allow us to spend more time with each of your questions. The main focus of these labs is to help you with the completion of the assignments. However, if you have trouble understanding a concept from the lecture or textbook, this period is also an excellent time to get your questions answered and problems solved. A TA will be in the lab room for as long as needed, so arrive in time for the beginning of your session. If nobody has shown up 15 minutes after the beginning of the session, the TA will leave.

STUDENT EVALUATION

Late Assignments: All assignments are due at the beginning of the Monday lecture in the week that they are due (see below for due dates). Submission of assignments is done by handing in paper copies (at the beginning of class) AND by submitting them by email to psyc202@queensu.ca This email address is for assignment submission, only. When mailing to this address, please list, in order, the last name of your teaching assistant,
your lab section, your last name, and your Assignment number. For example, if your name is Jane Doe and your lab section is Section 005 (that has Amanda Timmers as a Teaching Assistant) and you are submitting Assignment 2, then the subject line of your email submission should be:

**Timmers Section 005 Doe Assignment 2**

Both hand-in and email submissions are required and must be identical. In general, there are no extensions. However, if you have an important reason why you may not be able to hand an assignment in on time, and inform the TA or the course instructor of this reason in advance of the deadline, we may be able to mark it as handed in on time. **Late assignments will be penalized 10% per day.**

**Handing in Late Assignments:** If you are handing an assignment in late, you MUST submit a paper copy of the assignment to the Psyc 202 drop box located on the third floor of Humphrey Hall, directly above the computer lab. You must also email the administrative T.A., Michael Grossman (michael.grossman@queensu.ca), at the time you submit the assignment so that he will know to pick the assignment up, and you must submit your assignment by email to psyc202@queensu.ca.

**Missed Exams:** If you know that you will not be able to write an exam, you must inform the course instructor in advance. Otherwise, all missed exams will **RECEIVE A GRADE OF ZERO.**

**Evaluation:**

<table>
<thead>
<tr>
<th>Component</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>6 Assignments</td>
<td>2% each</td>
</tr>
<tr>
<td>Midterm</td>
<td>40%</td>
</tr>
<tr>

COURSE ASSIGNMENTS

Assignments are short write-ups or a set of problems that deal with topics we discuss in lectures and tutorials during the previous weeks. Each assignment is worth 2% of your final mark. Assignments can be downloaded from the course Moodle website on Fridays after 00:01 in weeks 1, 3, 5, 7, and 9. They are due at the beginning of class on the second Monday after they are released. For example, Assignment 1 will be released on Friday September 13, and will be due on Monday September 23. There is one EXCEPTION to this schedule. Assignment 6 will be posted early to ensure that you have sufficient time to complete it prior to the end of scheduled classes. Assignment 6 will be posted on Monday November 18 after 19:00 and it is due at the beginning of class on Wednesday November 27.

This assignment schedule accomplishes several things: First, you will have enough time (11 days including two weekends) to complete the assignments. Second, assignments are GENERALLY released before weeks featuring help labs, thus giving you time to begin working on the assignments and then, if required, get help during help labs. Finally, assignments will deal with material that was covered in lectures and labs immediately preceding release of the assignments. For instance, Assignment 1 will deal with material from Lectures 1 to 3, and Lab 1, as well as the assigned reading.

COURSE SCHEDULE

Here is a schedule with lecture and tutorial topics. Please be advised that this is a work-in-progress. Lecture topics may change or be rescheduled, depending on our progress and interest.

To prepare for lectures, read the assigned readings in the textbook. At the very least, skim through the appropriate chapters so you have a good idea what I will be talking about.

Lecture notes will be available as pdf files. You can download them from the Moodle course page. Lecture notes are not intended as a replacement for attending the lecture. In fact, most likely you will not be able to make sense of the lecture notes without having attended the lectures.

*Weeks where the LAB column is labelled with a T indicate teaching labs. Weeks where the LAB column is labelled with an H indicate help labs.

| Week 12: |  
| Nov. 25 | Ordinal Data Tests | Appendix E  
| Nov. 27 | Final Exam Review |  

Assign. 6 DUE
PSYC Departmental Policies

Missed Exams

Students who cannot write an exam during the December or April exam period due to a serious, extenuating circumstance (illness, death in the family) must follow the steps below to be eligible, and be available to write a deferred exam during the PSYC department’s Make up Exam period: January 10th/11th, April 28th, or September 12th/13th, 2014.

1. Obtain permission from their instructor to write a deferred exam. This requires notifying your instructor in advance or, under extraordinary circumstances, within 72 hours after, the exam, with appropriate documentation. Please use the Request for an Exam Deferral form found on our website or from the UG office and attach your documentation.
2. Complete and return the instructor-signed Permission for an Incomplete Grade form available on the Arts and Science website and return it to the UG office.
3. Be available to write the makeup exam during the first available PSYC Make up Exam period: January 10th/11th, April 28th, or September 12th/13th, 2014.

NOTE: Students who do not write the makeup exam are advised to drop the course. If a student cannot write the makeup exam due to a serious extenuating circumstance for which they can provide new documentation, they will either be granted a second deferral by their instructor or be supported in their appeal to drop the course after the deadline though this decision rests with the Associate Dean (Studies).

Accommodation after the fact

Once a student has written an exam or submitted an assignment, they may not subsequently be granted accommodation such as being offered a second opportunity to write the exam or assignment or have it count for less than originally specified in the course syllabus (rewighted).

Travel during exams

According to university regulations, students are expected to be available to write scheduled exams at any time during the official December and April examination periods as well as during any scheduled class times. Requests to write a make-up exam because of conflicting travel plans (e.g. flight bookings) or requests to miss an in class exam due to other plans will NOT be considered except under extraordinary circumstances. Students are advised to wait until the final exam schedules are posted before making any travel arrangements.

---

1 Appropriate documentation includes a signed letter from a registered health professional, Queens HC&DS, or documentation of a death such as a bulletin from a memorial service, obituary (newspaper or online) or funeral home letter. Official documents will be copied and originals returned to the student. Note that the PSYC department randomly checks document authenticity and that fraudulent documents will be grounds for a finding of a major departure from academic integrity.
