

Post-Doctoral Research Position Available in the van Anders Lab

social neuroendocrinology | feminist/queer science
sexuality | gender/sex and sexual diversity

Position Information

This position will be centrally involved in two research projects:

1. **Gender/Sex Diversity and Youth Experiences in Schools (SSHRC funded)**, a qualitative, multi-stage project that looks at gender/sex measurement in/for/with youth, inclusive/discriminatory schools practices, and links between these, emotions, and school experiences for youth
2. **Race/Ethnicity Configurations Frameworks (SSHRC funded)**, a qualitative, three-study project that looks at how people experience and understand their race/ethnicity, using some principles from Dr. van Anders' Sexual Configurations Theory (SCT) (though this project is not related to sexuality or gender/sex, FYI)

In addition, this position will also include involvement in **selected other ongoing/planned research** related to general research in the lab as well as some specific projects (gender/sex/ual diversity and SCT; SCT in clinical, therapy, counseling, and educational contexts; the heteronormativity theory of low sexual desire in women partnered with men; desire; pleasure; gender/sex/uality measures)

And, there is the potential for new projects that Dr. van Anders and the post doc are both excited about... [Click here](#) for more information!

Requirements

- Ph.D. in Psychology, Gender Studies, or another relevant field by start date
- Applicants are welcome from any citizenship!

How to Apply

Please send the following as one PDF in the order listed to Dr. Sari van Anders at sva5@queensu.ca:
